

Health Awareness Campaign

The Youth Red Cross Cell of St. Joseph Degree College on the occasion of the World Diabetic Day, i.e. 14th November conducted a camp to check Diabetic Levels of staff members in the premises of college. This survey has pooled up the data about the diabetic levels of the staff members. Then a Seminar session is organized to educate the staff members about the Diabetic. The Seminar is really useful as it created awareness about the causes, preventive measures of the Chronic disease the Diabetic. And it is explained through PPT. The session also includes the data of the staff who are already diabetic. Nevertheless, they were explained the measures to be taken to keep the diabetic level in control. The speaker of the seminar session is Dr.C.S. Sreenivas Rao., a senior Lecturer -in-Biochemistry and HoD of Zoology. His explanation of the subject is really impactful. The seminar session included many concepts about the disease, about the pancreas that does not produce enough insulin,it takes place when the body cannot effectively use the insulin it produces. This leads to an increased concentration of glucose in the blood. The session was Informative.
